Case Summary for "Benjaman Kyle":

- Discovered at 7AM on August 30, 2004 next to a dumpster located behind the Burger King in Richmond Hill, GA. The Burger King where he was found is located on Highway 17 directly across from U.S. Interstate 95 (exit 87).
- This 55-65 year old man was nude, face up, unconscious, eyes open, sunburned, sweating and covered with fire ant bites. He had three depressions in his skull.
- Further examination revealed a completely clean tox screen, normal LFT's and no sign that the UID had been living on the streets or that he was an alcohol or drug abuser.
- When he became conscious, he was blind (likely due to traumatic cataracts) and unable to identify himself by name, DOB, SSN or even home state.
- Doctors donated their services to correct his vision-when his vision returned he believed he had lost the last 20 years and was unsure of who he saw in the mirror. He believed his name was "Benjaman" (spelled this way), that he was born 10 years to the day prior to Michael Jackson and that he had memories of Denver CO, and possibly had 2-3 brothers. He thought his childhood home might have been in Indiana.
- Mr. Kyle has been assessed by linguists who believe he may be from north TX, OK, Indiana or Colorado, possibly KS.
- Mr. Kyle has some recovered memories that include information pertaining to the restaurant industry, the University of Colorado Boulder, downtown Denver (specifically Colfax Ave) and the Indiana State Fair.
- Mr. Kyle was brought to the attention of the FBI-they ran his prints through civilian and military databases in an effort to find him. They entered his prints into AFIS. Mr. Kyle's primary DNA has been entered into CODIS, his MtDNA is at the Univ of Texas Center for Human Identification, and his paternal DNA has been collected and run against Ancestry databases, his dentals and X-rays of previous bone injuries have been entered into the NCIC database. He is listed as a living UID, classification EUL-UID.
- Mr. Kyle was forensically hypnotized in March of 2009 over a period of two days. He has been hypnotized on two prior occasions with little success because he is not comfortable with the process.
- As of this writing there have been no real leads as to who he is.

Physical Description:

- BK is 5'11" and was 240LBS when found. He is 225 currently.
- Hair is Grey, eyes blue-green.
- He has no tattoos or piercing.
- His scars are limited to:
 - 1.) Scar at the base of his throat, likely from a cervical discectomy.
 - 2.) Two parallel surgical scars, likely from reparative surgery for broken elbow. XRAYs of pins on file with NCIC
 - 3.) Small round puncture type scar on the left side of his chin, possibly from a drained abscess.

Additional Information:

- Mr. Kyle is well read, devout in his faith, has a strong heavy build, has knowledge of electrical wiring and loves crossword puzzles.
- Hold back information-Mr Kyle's L shoulder is atrophied and slightly higher than the other.

The best resources for photos are the ones that appear on his Wikipedia article and the Doe Network Listing as they include the age regression photos created by the Dr. Phil Show.
